## FENG SHUI every day

Feng Shui is a Chinese science. It is more than 5,000 years old, but it is very popular today. In the Chinese language, "Feng" is "wind" and "Shui" is "water." According to Feng Shui, there are many things you can use to make your life healthy, like colors and furniture. For "good" Feng Shui, all the things in your life need to have a balance; your work, your friends, even your house and furniture! When you have a good balance, you also have positive energy, "Chi" or "Qi," as it is called in Feng Shui. Here are some things you can do in your house to make sure you have good Feng Shui.

- Don't keep things you don't need. Do you REALLY need ten pairs of black shoes? No!
- Clean your house especially the bedroom, kitchen and bathroom. It's the only way to start a healthy life.
- Rearrange the things in your bedroom. Don't put your bed across from the door or next to a wall. Have two night tables and use colors like white, light yellow or brown to paint the walls. Also, do not keep a computer or TV in there. They bring bad energy!
- Make sure you have good light in your house all the time. Open the windows a lot, so you get good clean air and light from outside.
- Close all your doors at night, even the bathroom and closet doors!

1. How old is Feng Shui?

It's more than 5,000 years old.

2. What can you use to make your life healthy?

Things like colors and furniture.

3. What colors are good for a bedroom?

Colors like white, light yellow or brown.

4. What do you need to do every night?

Close all the doors, even the bathroom and closet doors.
