CHOICE BOARD SELF-REFLECTION & EVIDENCE

Dear all,

In these slides you will share evidence of your work in the choice board and you will write comments about

1. the effort you put forth in every activity
2. how the activities helped you as a learner
3. whether they were easy/hard to complete
4. whether they were engaging, interesting, effective...

Remember that

self-reflection helps you to review your work and reflect on your learning progress. It also allows you to participate in and take ownership of your own learning.

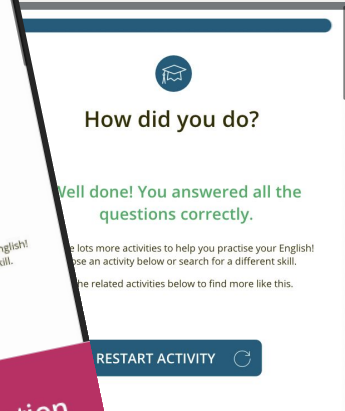

This practice is an important component of **emotional intelligence** & a tool to develop **critical thinking skills**.

In my process of this task, it was a bit difficult for me since I had to access the link, and since I didn't know how to enter the activities I was a bit confused, but when I understood it it was easier to be able to perform them, and more because I could choose the subject for example I chose grammar, vocabulary, speaking, writing and listening; But of course I had some problems doing the vocabulary and grammar activities since the topics that were addressed I did not remember how to use them, but by reading the instructions and the texts I could complete them.

Whit this activities I can learn new vocabulary, how to use it and also reading comprehension, I think this activities help us to be autonomous and learn by ourselves, unless I think that are a little simple and, for me I always want to know more about information and concepts.

These activities help me to practice English grammar and pronunciation on an independent level. The activities were easy and engaging for me, I really love doing these types of activities. I did my best to respond to the activities and Wow! I had an excellent score, although I thought it was going to be more difficult for me. I think these types of applications are excellent for students, because it helps us to practice at home and also shows us the errors.

Sometimes I do not know how the words are written and above all a problem that I currently have is that I have not been able to fully understand what they say to me since I do not fully understand what they want to tell me, so I get to carry out several activities regarding that problem to be able to understand better how to identify the words.

These activities are very fun, dynamic and entertaining, they were very easy to do, it does not take you more time than indicated, they are very effective since you put more into practice your vocabulary and put into practice listening. In all the activities I gave them the same effort to read the instructions and after doing the activity.

The image displays six screenshots of the Cambridge English Learning website, arranged in a 2x3 grid. Each screenshot shows a different activity completion screen. The top-left and bottom-left screens show a '100%' completion rate. The top-middle and bottom-middle screens show a 'Well done! You answered all the questions correctly.' message. The top-right and bottom-right screens show a 'Well done! You answered all the questions correctly.' message and a 'RESTART ACTIVITY' button. The screenshots are taken from different browser windows, as indicated by the multiple address bars and taskbars visible at the bottom of the image.

I think that with these activities we can improve learning seen in class, what is seen in class is very practical but the activities that are presented to us on the platform are very fun and practical and you don't waste much time doing them
